

The Regular Season Metapuzzle

As the regular season winds down, we will need somewhere to play our post-season games.

This metapuzzle uses the answers from A Word from Our Sponsor, Benchwarmers, Double Header, Line Drives, Mascots, Sabermetrics, Safe! and Strike-Outs.

The Regular Season took place from October 7th through October 15th, and determined the eight teams that will be in the playoffs. When checking your Regular Season puzzle answers, you must identify the team suggested by the answer. (See the Introduction for examples.) Each team will come from the appropriate division for that puzzle, so the American League East puzzle will clue a team from the American League East, while the Wild Card Puzzles will clue a team from anywhere from that League.

Once you have identified the eight teams, you will have to answer this question:

Where can we find space to play?
