

# ■ The Stars Came Out

Last night the stars came out, literally! In each of the sets of three movies, I've removed any letter appearing in the star's name. For example, if the star were JACK NICHOLSON, you might see the movies F\*VE E\*\*Y P\*E\*E\*, \*\*\*\*\*T\*W\*, and T\*E W\*T\*\*E\* \*F E\*\*TW\*\*\*. For each row, identify the two stars and their common film together. First letters of these films will spell someone who recently played an out-of-the-closet character.
